RECOGNIZING HANDWRITTEN SYMBOLS

S. L. Xie and Minsoo Suk 1 On machine recognition of hand-printed Chinese characters by feature relaxation

I. Sekita, K. Toraichi, R. Mori, K. Yamamoto and H. Yamada 9 Feature extraction of handwritten Japanese characters by spline functions for relaxation matching

L. Lam and Ching Y. Suen 19 Structural classification and relaxation matching of totally unconstrained handwritten zip-code numbers

J. W. Roach and J. E. Tatem 33 Using domain knowledge in low-level visual processing to interpret handwritten music: an experiment

Ling-Hwei Chen and Wen-Hsiang Tsai 45 Moment-preserving line detection

V. Radhakrishnan and G. Nagaraja 55 Inference of even linear grammars and its application to picture description languages

D. F. Watson 63 Natural neighbor sorting on the n-dimensional sphere

C. R. O. Lawoko and G. J. McLachlan 69 Further results on discrimination with autocorrelated observations

Announcements 73 SPIE's 1988 Technical Symposium Southeast on Optics, Electro-Optics and Sensors
9th International Conference on Pattern Recognition

Software Survey Section i

Number 2

H. H. Chen and T. S. Huang 75 Maximal matching of 3-D points for multiple-object motion estimation

R. M. Brown, T. H. Fay and C. L. Walker 91 Handprinted symbol recognition system

D. Stern and L. Kurz 119 Edge detection in correlated noise using Latin Square masks

F. Caroti Ghelli 131 A sequential learning method for boundary detection

Dong-Chen He, Li Wang and J. Guibert 141 Texture discrimination based on an optimal utilization of texture features

A. Rosenfeld and A. C. Sher 147 Detection and delineation of compact objects using intensity pyramids

E. A. Parrish, Jr and W. E. McDonald, Jr 153 An improved adaptive pattern analysis algorithm for isolating EMI

J. R. Engelbrecht and F. M. Wahl 155 Polyhedral object recognition using Hough-space features

J. Kittler and D. Pairman 169 Optimality of reassignment rules in dynamic clustering

M. Kamada, K. Toraichi, R. Mori, K. Yamamoto and H. Yamada 175 A parallel architecture for relaxation operations

T. Krishnan 183 Efficiency of learning with imperfect supervision

D. M. Young, D. W. Turner and V. R. Marco 189 On the robustness of the equal-mean discrimination rule with uniform covariance structure against serially correlated training data

Software Survey Section i

Number 3

J. F. Haddon 195 Generalised threshold selection for edge detection

T. M. Caelli and Zhi-Qiang Liu 205 On the minimum number of templates required for shift, rotation and size invariant pattern recognition

P. Meer, E. S. Baugher and A. Rosenfeld 217 Extraction of trend lines and extrema from multiscale curves

S. Tamura, Y. Okamoto and K. Yanashima 227 Zero-crossing interval correction in tracing eye-fundus blood vessels

L. Gupta and M. D. Srinath 235 Invariant planar shape recognition using dynamic alignment

A. M. Wallace 241 A comparison of approaches to high-level image interpretation

M. Amadasun and R. A. King 261 Low-level segmentation of multispectral images via agglomerative clustering of uniform neighbourhoods

C. Daniłowicz and Ngoc Thanh Nguyen 269 Consensus-based partitions in the space of ordered partitions

K. Toraichi, S. Yang, M. Kamada and R. Mori 275 Two-dimensional spline interpolation for image reconstruction

Corrigendum 285

Number 4

G. Baptista and K. M. Kulkarni	287	A high accuracy algorithm for recognition of hand-written numerals
T. S. El-Sheikh and R. M. Guindi	293	Computer recognition of Arabic cursive scripts
Chen-Chau Chu and A. C. Bovik	303	Visible surface reconstruction via local minimax approximation
Y. M. Enab and J. Y. S. Luh	313	Shape from a single view using matching method
M. T. Musavi, M. V. Shirvaikar, E. Ramanathan and A. R. Nekovei	319	A vision based method to automate map processing
F. W. Zaki, A. I. Abd el-Fattah, Y. M. Enab and S. H. el-Konyaly	327	An ensemble average classifier for pattern recognition machines
P. L. Love and M. Simaan	333	Automatic recognition of primitive changes in manufacturing process signals
S. Tamura and S. Kawasaki	343	Recognition of sign language motion images
M. W. Kurzyński	355	On the multistage Bayes classifier
G. Gibbon	367	Weighted chord functions
S. Kundu	381	A class of linear maps for error corrective dimensionality reduction of binary templates
R. M. Umesh	393	A technique for cluster formation
M. Kudo and M. Shimbo	401	Efficient regular grammatical inference techniques by the use of partial similarities and their logical relationships

Number 5

W. Siedlecki, K. Siedlecka and J. Sklansky	411	An overview of mapping techniques for exploratory pattern analysis
W. Siedlecki, K. Siedlecka and J. Sklansky	431	Experiments on mapping techniques for exploratory pattern analysis
Zen Chen and Der-Baau Perng	439	Automatic reconstruction of 3D solid objects from 2D orthographic views
D. Campbell and J. Higgins	451	Matrix method for finding sets of contiguous non-zero elements in a 2-dimensional array—II
A. Goshtasby and R. W. Ehrich	455	Contextual word recognition using probabilistic relaxation labeling
R. M. K. Sinha and B. Prasada	463	Visual text recognition through contextual processing

T. Nagata and H. B. Zha 481 Determining orientation, location and size of primitive surfaces by a modified Hough transformation technique

O. A. Zuniga and R. M. Haralick 493 Gradient threshold selection using the facet model

N. H. Kim and A. C. Bovik 505 A contour-based stereo matching algorithm using disparity continuity

M. Pawlak 515 On the asymptotic properties of smoothed estimators of the classification error rate

D. D. Kerrick and A. C. Bovik 525 Microprocessor-based recognition of handprinted characters from a tablet input

D. A. Pintsov 539 Letter to the Editor

D. Casasent and R. Krishnapuram 543 Reply to David A. Pintsov

G. J. te Meerman 545 Letter to the Editor

Software Survey Section i
